

Cliff Notes Charge Sheet 1

Dearborn Scam

The Lyme Enterprise (Part One)

- The “Enterprise” (a RICO term) is the “American Lyme Disease Foundation.”
 - Here we will refer to them as “the Cabal.”
- “The testing for Lyme disease was falsified to pass off fake vaccines and test kits for the “Enterprise”
- Persing states that you can’t tell the difference between late, “multi-system” Lyme and LYMErix injury (they both are essentially the same as post-septic shock).
- Steere falsified the testing in Europe to assure that this RICO cabal would be the only companies in North America (yes, they mentioned Canada, too) to be able to receive blood for Vector Borne Diseases (VBDs) testing, and thereby have access to all the new VBDs to ALSO patent.
- **Pam3Cys is managed by TLRs 2 and 1.**
 - Something that is triacylated and managed by TLRs 2 and 1 could never have been and was never a “vaccine.”
 - It was the opposite, a fungal endotoxin more toxic than lipopolysaccharide (LPS), a TLR4 agonist.
- **Originally, Lyme borrelia were perceived by the U. S. Centers for Disease Control and Prevention (CDC) to be just another group of Relapsing Fever organisms.**
 - Borreliae (the whole genus) undergo constant antigenic variation, making vaccines and valid testing impossible except for detection via an anti-flagellar antibody method.
- **It was decided by CDC officers that they should commercialize Lyme and other emerging, tick-borne diseases by patenting vaccines and test kits based on recombinant antigens**
- **The ALDF.com is a Government-Defrauding, Racketeering, and “Deprivation of Rights under Color or Law” organization, where the wealthy “sponsors” were apparently given some inside information regarding the companies that would be manufacturing the bogus recombinant vaccines and test kits.**

- **The Cabal, via changing the diagnostic standard, claimed Lyme was not just another Relapsing Fever organism, but some entirely different disease.**

- **The American Lyme Disease Foundation, or ALDF.com enterprise of intended Vector Borne Disease (VBDs) vaccine and test kit DNA profiteers (henceforth,“the Cabal”) changed the disease’s name to “Lyme disease” from “Lyme borreliosis.”**
 - They conspired to make Lyme relapsing fever even more undetectable
 - There was a 50-year roll out plan for DNA patented vaccines and test kits due to the emerging tropic infections from global pollution.
 - Their plan: make Lyme only 15% detectable so that the Cabal would be guaranteed to have an at least 85% “effective” vaccine
 - This slander and libel are “Deprivation of Rights via Color of Law” criminal charges because the Cabal includes CDC officers Alan Barbour and Barbara Johnson

- **Shed fungal antigens like OspA were the very things responsible for the New Great Imitator outcomes.**

- **OspA or a triacyl lipopeptide or Pam3Cys gums up the immunity-work.**

- **Allen Steere is the foundation of the CDC’s original, fairly accurate and correct, 1990, “Lyme disease” “case definition” blood test (serology)**
 - It was later thrown out and replaced at a farce of a serology consensus conference put on by the CDC in 1994 in Dearborn, MI.
 - Steere also wrote in the 1986 report that became the basis of this 1990 case definition that all you need is band 41 to diagnose Lyme;
 - just rule out syphilis.

- **Before a diagnosis of Lyme, and of course in all illnesses, it is recommended to rule out blood cancers.**
 - The symptoms of Chronic Lymphocytic Leukemia are identical to chronic Lyme or Multiple Sclerosis (MS),
 - not to mention the fact that Lyme and LYMERix both are known to cause cancer, MS, Lupus, and possibly Rheumatoid Arthritis (RA) via the reactivation of latent herpes viruses.
 - **Chronic, late, neurologic Lyme victims are tolerized to these fungal type-, TLR2/1-agonist bearing diseases.**

- Edward McSweegan, in a fake whistleblower letter to Senator Barry Goldwater, discredited the U.S. Navy to divert their vector borne diseases funding to his ALDF.com cabal.
- **1988**
 - Raymond Dattwyler, JJ Halperin, et al, & immune-suppressing, seronegative Lyme; supernatant (lipid layer) of borrelia mash causes NK cell anergy or a blunted immune response.
- **1990**
 - **CDC: "Diagnose Lyme as if it was Relapsing Fever" as previously mentioned.**
 - <ftp://ftp.cdc.gov/pub/Publications/mmwr/rr/rr3913.pdf>
 - Allen Steere reports that "chronic, neurologic Lyme won't test positive," uses Dattwyler and Volkman's Seronegative Lyme T Cell Assay
- **1992**
 - CDC officer Allen Steere falsifies testing in Europe
 - 3) Steere used high passage strains which lose plasmids and therefore potential antigens (meaning if you have those antibodies, they wont be detected).
 - The monopoly on post-LYMERix-FDA-approval testing for all vector borne diseases in America and Canada was their stated intention (entrepreneurial or enterprise = RICO). Once LYMERix was on the market, a strain of borreliae that did not have the vaccine antigens in it would have to be used for testing for "Lyme."
 - The Cabal falsified the "case definition" to leave out neurologic Lyme cases, and they left OspA and B out for a later monopoly on testing and future patents.
 - 1992
 - CDC staff, Barbara Johnson and Joe Piesman, own patents with SmithKline that show 2 kinds of Lyme, HLA-linked and non-HLA-linked antigens
- **1993**
 - Barbour and Fish slam Neurologic Lyme victims in:
 - <https://www.ncbi.nlm.nih.gov/pubmed/8503006>
 - Barbour and Fish admit in this report that Phase I and Phase II trials of OspA vaccines are underway.
 - The Cabal left out the neurological outcomes in their Dearborn scam.
 - The whole point of the redefinition of Lyme at Dearborn was to narrow it to just the HLA-linked, arthritis, supposedly autoimmune, hypersensitivity cases.
 - This is how and why they get away with perjury.

Sikand—the very people who ran the OspA trials). It came onto the market in late 1998 “despite numerous provisos.”

- More than 1,000 systemic adverse events were reported through the VAERS from September 1999 to November 2000, whereupon the FDA granted a public hearing, January 31,
 - **2001:**
 - Whereupon, the whistle was blown on Dearborn and how LYMERix actually caused immunosuppression (the FDA did not scan in the last 19 pages of this booklet, which were 19 pages out of the Dearborn booklet, proving no one agreed with Steere's proposal for an antibody panel for a "case definition"):
- We're still stuck with this bogus Dearborn case definition, despite numerous attempts at lawsuits against IDSA, SmithKline, and filing complaints to the U. S. Department of Justice. It is still very dangerous for the public to be unaware that the average person, or 85% of us—who are the "seronegative patients are the sickest," have no chance of testing positive to this criminal CDC-Dearborn standard, because the actual disease is one of immunosuppression, or is an Acquired Immune Deficiency, or is similar to AIDS with all the opportunistic viral infections and lymphocyte mutations that can't be treated with antibiotics, alone.
- It was said at the time LYMERix was still on the market that this vaccine, via its claimed mechanism of disinfecting ticks with human antibodies that LYMERix would turn humans into walking canisters of tick disinfectant, when in fact, LYMERix turned people into walking “cesspools of disease.”
 - The same is true for Chronic Lyme. Chronic Lyme victims' immune systems are “overwhelmed”- a term used by CDC officer Alan Barbour, when describing what antigenic variation in spirochetes does to humans (US Patent 6,719,983).
 - “overwhelmed” immune system means: “turned off.” “Turned off” is the complete opposite of an “inflammatory” or autoimmune disease.”
