

Cliff Notes Charge Sheet 2

THE PATENTS

- All the ALDF.com and DNA patent-owners, here, have slandered and libeled against Lyme victims, making this not simply a negligence charge.
 - All of their derogatory slander and label and trash-talking Lyme and LYMERix victims show “intent to cause harm.”
- **Barbour, Alan G**
 - CDC officer and participant in the Dearborn conference, owns 30+ patents
 - The ImuLyme vaccine trial report authors (Sigal, et al) and Barbour assert that one must be sure lipids are attached to all Osps or else they will not be immunogenic, yet Steere’s Dearborn panel was developed from high passage G39/40 and FRG with recombinant OspA and B with no lipids attached, leaving OspA and B out of the case definition panel.
 - Barbour’s ImuLyme patent (Berstrom, Magnarelli) European Patent # (5092/88, DK)
 - Yale’s LYMERix OspA patent (5,747,294):
 - Only Corixa, Imugen and Yale were to be licensed to use the RICO strain patent by Dave Persing (US Patent # 6,045,804)
 - MarDx was then sold to a company in Ireland, taking all the fraud data with them; Trinity Biotech was the name of the company that bought MarDx).
 - Barbour also patented Masters’ disease or STARI
- **Johnson, Barbara J.,**
 - CDC officer, Ft. Collins, CO
 - owner of 5 patents in Europe with SmithKline
 - Johnson’s Patents (5 in all):
