

Charge Sheet Cheat Sheet 8

Uconn Assaults Czech children

- The State of CT and Yale assaulted Czech children with a vaccine that they knew would do them no good, as there is none of the B31 version of OspA (LYMERix) in Europe.
 - They simply assaulted these children to see how severe would be the adverse events.
 - There is none of the LYMERix kind of B31 strain of Borrelia in Europe. So, this experiment was simply “assault.”
